# WHAT IS MÖLKKY?

Mölkky is a Finnish game that combines elements of tactics and precision.

The wooden skittles are numbered from 1 to 12, and the players' task is to score points by knocking down the skittles using a wooden thrower.

The players have to score exactly 50 points - these are collected in two ways:

- By knocking down several skittles in one throw - the player gets as many points as the number of skittles dropped
- By knocking down a single skittle - the player gets as many points as the number written on the skittle.

The game can be played on almost any surface. The competition is organized in a team or individual formula.

Full rules can be found at: <http://molkky.pl>
