How to use MM2025.molkkify.app?

During the 2025 Mölkky World Championship, we will all use a web application available at **mm2025.molkkify.app**, which we have developed together with our sponsor **techlabee.ai**, to manage the tournament and its results.

techlabee.ai

Key information

1. The entire tournament schedule, match schedule, and assigned fields can be found in the app.
2. **The result of each match must be entered in the app and confirmed with a PIN by both teams. The result is entered on one device.**
3. The **result approved by both teams in the app is recorded in the results** and **means that both sides accept it** and it is considered valid.
4. After the match, **leave the scoresheet on the clipboard by the field** – we do not collect them at the tournament office.
5. The scoresheets contain match numbers/QR codes that you can use to enter the result.
6. To use the app (to approve results), **you need your PIN** – the code that your team provided during registration.
7. **To log in to the app and access more features**, you need your PIN and the email address your team used to register for the tournament.
8. During the tournament, a **Wi–Fi network will be available at the event venue**, which can **only be used to access the app** (it will not be possible to use it to access other services).

For example, after a match between team A and team B, a player from team A launches the app and enters the result of the match between team A and team B. The result entered on their phone is shown to the player from team B. The player from team A enters their PIN to accept the result and gives their phone to the player from team B, who enters their PIN after checking the result. The result is immediately visible in the Molkkify app.

Entering the match result

There are three ways to access the match view, where you will enter the result after the match has ended:

1. **Enter the match number** – you will find the match number at the top of the scoresheet
2. **Scan the QR code** – you will find the QR code for the match at the top of the scoresheet
3. RECOMMENDED: Aft**er logging** in with your email address and PIN (both provided by your team during registration), **click on your match** and you will be automatically redirected to the score entry screen

Entering the match result

After the match is over, enter the score in the match view.
You will not be able to accept the score if one team does not have 50 points in one set (i.e., a score of 40–20 will not be accepted).

After entering the score, a field for entering the PIN will appear on the screen – in order for the score to be recorded, both teams – on just one device – **must accept it with their individual PIN.**
Each team assigned itself a PIN during registration (you can find it, for example, in the registration confirmation email from Google Forms).

After the correct PINs have been entered, the result will be recorded in the "Results" section.

After entering the results into the app, do not bring the scoresheets to the competition office! Leave them pinned to the clipboard next to the lane.

In the playoffs, you don't have to fill in the results for all sets!
If you are playing "Best of 5" and the result ends 3:0, enter the results for 3 sets and leave the other 2 lines blank.

Results

You can find the match results in the "All results" tab.
There you can see the results of all matches of all teams divided into groups. The "Play–off" and "Bracket" tabs will be available after the group stage is over and the teams that will play in the play–offs have been determined.

The "All results" tab is available to everyone – anyone, from anywhere in the world, can follow the results live in the form of a table and a preview of the result of each match:
https://mm2025.molkkify.app/results

You can also click on the name of any team to see its lineup and the matches played or to be played by that team.

Each team also has its own unique link (copy it from the browser bar) – if you want to send someone a link to your team's profile, they will be able to follow your results on it.

The times displayed in the app are the times in the time zone you are in!
When you are in Poland, you will see the times applicable in Poland during the tournament. If you are currently using the app in Japan, for example, you will see the times in Japanese time.

Login

To log in, select the "Log in" option on the home page.

To log in, you need:
- the **email address** used to register the team
- the **PIN** assigned by the person who registered the team.

You can find this information in the tournament registration confirmation form (from Google Forms).

All team members can log in using the same credentials.

My Matches

If you are logged in, your main screen is the "My Matches" view.

There you can see:
- the number of matches played/remaining to be played
- matches remaining to be played – including the field number, match time, and countdown to the start of the match
- matches played, including the results.

If you are logged in and want to enter the match result, you can do so from here by selecting the "Enter results" button.

If you are logged in and go to the All results tab, you will find the results of all teams in all groups (your team will be highlighted in red).

Notifications

Once you are logged in, you can use the notification option.
To access it, **click on the "bell" next to the logout icon**. (1)

In the "Notifications" tab, you can enable:
- **push notifications** (so that you receive notifications on your locked screen – NOTE! If you want to enable this option on your iPhone, see the next page! On Android, you don't need to do anything else) (2)
- notifications about your upcoming matches (15 minutes before they start) (3)

In this tab, you will also see all the notifications you have received (you will also see a red dot next to the bell) – these may also be additional messages from the organizers.

When logged in, **you can also follow any team participating in the tournament** – go to the team's profile and click on the "bell" – you will receive information about the results of that team's matches. (4)

Please note! You are following the team's data as your profile – this means that all members of your team who log in will receive the same notifications.

Push notifications on iPhone

If you want to receive PUSH notifications on your phone (i.e., those that appear on the locked screen) with iOS software (iPhones), you must:
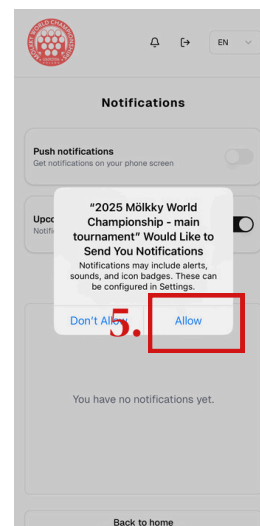

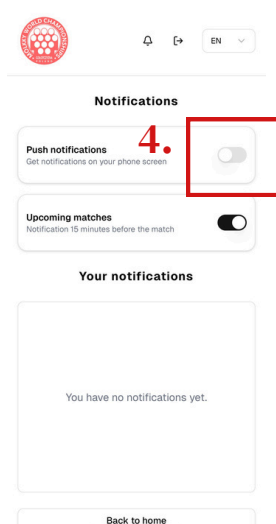

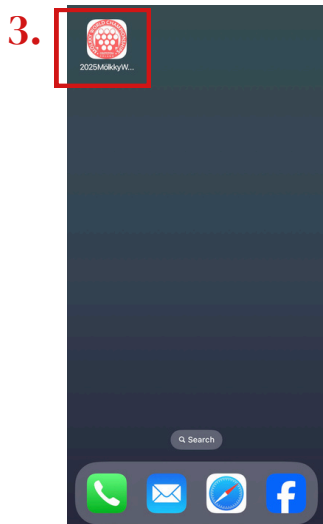

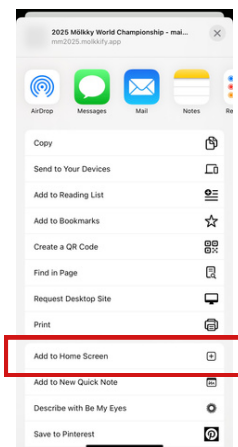

1. Open the following website in your browser:
   https://mm2025.molkkify.app
2. Add the page to your home screen
3. Launch the page from your phone's Home Screen (it now works like a mobile app on your phone – you will not see the browser bar, for example)
4. Log in
5. Enable push notifications
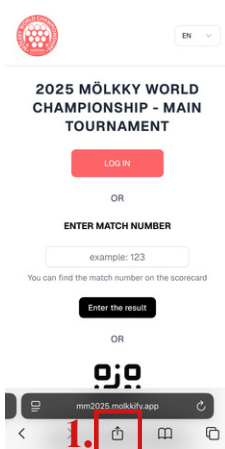

Safari
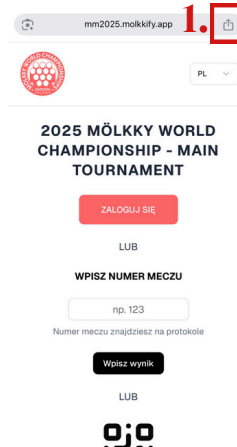

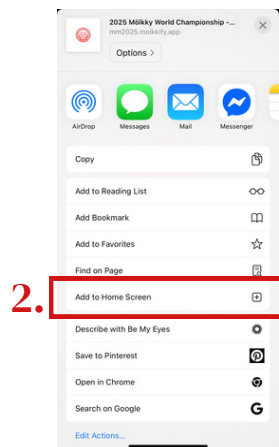

Google Chrome

Settings and technical issues

1. In the app, **you can select the language** from several translations we have prepared (Polish / English / Japanese / Finnish / French).
2. If your phone has one of the above languages set as the default, it should automatically switch to the language you use on your phone.
3. **The times displayed in the app are the times in the time zone you are in!** When you are in Poland, you will see the times applicable in Poland during the tournament. If you are currently using the app in Finland, for example, you will see the times in Finnish time.
4. If you are logged in, you can log out of the app by clicking the icon next to the language change.
5. The entire team can use one account.
6. In the simplest version, **you ONLY need YOUR PIN to participate in the tournament**.
7. If you notice any errors (regarding the name/team members), please report them to us before the tournament at mm2025@molkky.pl
8. If you notice an error in the entered result, please report it immediately to the tournament office during the tournament.
